**CISSP Training and Certification**

Certified Information Systems Security Professional

**ADVANCE YOUR CAREER!**

This CISSP DVD courseware by Shon Harris at Logical Security is designed to fully prepare you to become a Certified Information Systems Security Professional.

All our CISSP training material has been recently completely updated to map to the new (ISC)2 CISSP test requirements!

The CISSP certification meets the US DoD 8570 Management Level 2 and 3 requirements (Mgmt II and Mgmt III) as well as the Technical requirements at Level 3 (Tech III).  
Get one certification and fulfill 3 of the 6 levels that exists within the DoD Directive 8570 on Information Assurance Training, Certification, and Workforce Management.

This CISSP training by Logical Security is delivered by one of the industries most sought after security instructors. Logical Security gives you the flexibility and affordability you need by delivering the entire CISSP course through a computer-based training system.

"Great Instructor. Thoroughly covered all topics with expertise. Focused our attention to the pertinent information. This was a Great Experience."

**NEW NEW NEW!**

[Penetration Testing Hacking Training CPTS Certified Pen Testing Specialist Package](#)  
[Click Here](#)

This NEW and RECENTLY UPDATED 34-hour course on DVD is the same class Shon Harris teaches around the world for large corporations and organizations including RSA, BMC Software, NSA, Depts. of Energy and Defense, Microsoft and Bank of America.

Shon provides real-world scenarios, examples and explanations so that you can truly grasp even the most complicated concepts. The CISSP course includes 3-D animations that conceptually walk you through critical topics. Text highlights, illustrations and question and answer sessions ensure full comprehension.

This program is very similar to our CISSP Instructor lead, classroom training, but instead of being limited to a classroom and keeping pace with the speed of the class, you will get the same content presented in a fashion that is very well suited for a total learning experience. You are able to learn at your own pace, replay key sections and reap the full benefit of industry experts.

There are 40% more jobs available requiring a CISSP than jobs requiring a CCNP.\*sampling  
Monstor.com and Dice.com.  
Of the jobs listed that gave salaries, the average starting pay for a CISSP was over \$80,000 per year.

The CISSP certification is a very broad certification but not so technical that it's hard to understand. This is useful info for not only IT support professionals but Senior Management, Department Heads, and of course those looking to advance their careers.

CertCities.com Reader's Choice Awards named CISSP as the Best Security Certification and a Finalist for the Most Respected High Level Certification in 2003. The CISSP has also been ranked as one of the 10 Hottest Certifications by CertCities.com in 2003 and 2004.

You will learn directly from our expert team. All Logical Security instructors featured on our CBTs

are well known, industry leaders who also are practicing security experts.

Your computer based training is convenient, easy-to-use and allows you to learn at your own pace and whenever it meets your schedule.

You will benefit from the best courseware. This courseware is written by the very best, most experienced people in the industry.

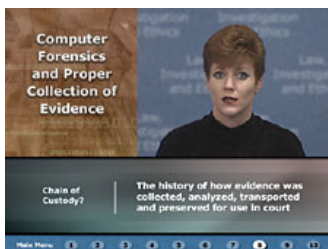

Logical Security provides a comprehensive CISSP Training program with the goals of not only helping you achieve your CISSP certification, but to truly teach you all of the complex concepts that encompass the CISSP exam. You will learn the contents and concepts of the diverse domains and how they should work together to provide true defense-in-depth.

**CISSP COURSE OBJECTIVES**

Our objective is to not only to prepare you for **CISSP Certification**, but to also provide you with practical, detailed understanding and knowledge of each domain and topics that will be of value and use within your company. The course focuses not only on the areas from the **CISSP exam** perspective, but also from a more detailed and practical perspective. We cover areas including security policy development, secure software development procedures, network vulnerabilities, attack types and corresponding countermeasures, cryptography concepts and their uses, disaster recovery plans and procedures, risk analysis, crucial laws and regulations, forensics, computer crime investigation procedures, physical security - and much, much more.

This tool provides you with a proven method for mastering this expansive range of knowledge!

**Newly Updated - NOW 34 HOURS OF MATERIAL ON 2 DVD-ROMS - Order Today and Get Shon Harris' latest 4rd Edition Bestselling Study Guide that includes a CISSP Exam Simulator!**

"I just wanted to let you know that I received an e-mail from ISC2 say that I had passed the CISSP exam. I also wanted to thank you so much for all your help, had it not been for your incredibly hard work, dedication to the class and guidance I would never have passed the exam the first time. Thank you so much for your help, friendship and guidance."

-Russell Walker

**CISSP Exam**

The CISSP (Certified Information Systems Security Professionals) exam is a six-hour, monitored paper-based exam covering 10 domains of information system security knowledge, each representing a specific area of expertise. The CISSP examination consists of 250 multiple choice questions, covering topics such as Access Control Systems, Cryptography, and Security Management Practices, and is administered

by the International Information Systems Security Certification Consortium or (ISC)<sup>2</sup>. (ISC)<sup>2</sup> promotes the CISSP exam as an aid to evaluating personnel performing information security functions. Candidates for this exam are typically network security professionals and system administrators with at least 4 years of direct work experience in one or more of the 10 test domains. The training course maps to the exam objectives and offers numerous features such as exam tips, case studies, and practice exams.

**CISSP Course Objectives**

- Domain 1 Security Management Practices
- Domain 2 Security Architecture and Models
- Domain 3 Preventive Maintenance
- Domain 4 Application Development Security
- Domain 5 Operations Security
- Domain 6 Physical Security
- Domain 7 Cryptography
- Domain 8 Telecommunications, Network, and Internet Security
- Domain 9 Business Continuity Planning
- Domain 10 Law, Investigations, and Ethics

**"Shon is a great instructor. She is amazing with her speaking ability. She had enough energy to lecture through all the material with excitement."**  
 -James Jester, Raytheon

**"I thought she was great. Very Knowledgeable"**  
 -Marshall K. Possey - Spectrasite

**"Shon is a great instructor, and is one of the few people that I have met that has a strong background in the 10 domains of ISC."**  
 -John J. Ford - Trinet Consulting

**"Awesome! Shon has in-depth knowledge and the ability to communicate it."**  
 -Cindy Masters - Children Discovery Museum

**"Very knowledgeable about the subject matter. Clear and concise. Kept control at all times. Remained focused"**  
 -Don Branken - Florida Department of Transportation

**"Personality, knowledge, skills and attitude made this very long week quite rewarding. Shon kept the class flowing and the information received will be retained and utilized – exceptionally beneficial super training – very well organized, personable and professional throughout the week."**  
 -William Simmons - WorldCom

**"Shon has a great knowledge of the domains of the CISSP. Her presentation drove home the points needed to get certified"**  
 -Scott Weaver - AT&T Federal Solutions
