"Taken as a whole, this is a powerful PC diagnostics software tool. I would have no problem with recommending it to any technical support person or hardware hobbyist... No one tool is perfect, but as diagnostic software goes, this ranks near the top of the heap."

**Overclocked Cafe Reviews**

"Eurosoft's Pc-Check® has helped to keep our PC hardware services running smoothly for over 6 years running" - **Nick Marsh Synstar International.**

"We found it to be user friendly and consistent. We have tried other diagnostic tools but found them to be tedious, time consuming and not really user friendly."

**Anthony Ross Jr - AT&T**

"We are very pleased with the results of using Pc-Check diagnostic utilities and look forward to using the program to its fullest extent."

**Mark Drake - Convergent Communications**

**Business benefits:**

- **Technical support included**
- **Saves hundreds of wasted man-hours in fault testing during system building, servicing and repair**
- **Cuts assembly, upgrade and repair test workloads**
- **Improves service reliability and reduces costly returns, RMAs and repairs**

**Technical highlights:**

- **Ensures that PCs are accurately tested and validated from configuration to core components**
- **Unique Microtopology Memory Testing ensures maximum interrogation of every cell including heat and power-cycling testing**
- **Original self-boot operating system to bypass installed OS for ease of use**
- **RIS/PXE available with site license**

**PC-Check PC Diagnostic Software** offers ease of use coupled with comprehensive diagnostic testing. **Both commercial and individual PC users** can quickly identify and correct PC problems, and review hardware configurations and performance.

Competition beating memory testing, perfect for any PC – desktops, servers, portables, industrial and remote – **PC-Check PC Diagnostic Software saves you time and money!** Pc-Check® has a special self-booting program so you can safely avoid boot sector viruses and work independently of operating systems such as Windows® or even Unix. Test results can be easily printed to a file or printer.

Pc-Check®'s advanced diagnostic menu provides precise error identification of both fixed and intermittent faults of all major hardware components. Pc-Check®'s extensive range of tests can be selected for either single-pass, or continuous burn-in testing. Over twelve command line test combinations are available, including interactive tests with Loop-Back Plugs, POST cards, Status Indicator Boxes (S.I.B.s) and error logging to file. The Eurosoft Script Program (E.S.P.) allows you to write your own test test commands to integrate with your existing test routines.

Extensive system information, such as DOS memory mapping of loaded device drivers and CMOS editing in two functional areas means that the installation or reconfiguration of hardware can be achieved easily and quickly. Full analysis of all memory areas, cache sizing and hard &

floppy drives allows straightforward and rapid determination of performance and upgrade requirements.

Pc-Check® is updated continuously as new PC hardware comes on to the market. The in-house R&D team stays current with technology, allowing customers to benefit from newly introduced functionality such as intelligent test cycles, multimedia analysis and current system identification.

### **NEW! Pc-Check Updated Features:**

**NEW!!! Pc-Check now available and bootable from a CDROM ...increase testing coverage, bootable from the CDROM drive. Test PCs without a floppy drive more easily. Also includes Pc-Check v4.54 for testing older PCs without a CDROM drive.**

**NEW!!! AC'97 audio tests ...confirm the functionality of most popular Intel, AMD and VIA on-board audio chipsets with both synthesised and streamed audio.**

**NEW!! FireWire controller tests ...providing universal support for information and verification of your FireWire controller hardware. Performs packet DMA testing and aids compliance level determination.**

**NEW!! Interactive command line options ...hot key activation allows quick and easy selection of session test scripts.**

**NEW!! System stress test ...performs simultaneous hard disk, CDROM, memory and processor activity to check system stability and identify problems that may not occur when components are tested individually.**

**Enhanced self-boot operating system ...changes to the EuroDOS operating system permits results output to hidden FAT diagnostic partitions.**

**Enhanced serial port testing ...detect and test up to 8 serial ports on electronic point of sale systems with the new ePoS option.**

**Enhanced DVD drive testing ...using Eurosoft's DVD Test Disk, test that the DVD drive is able to read Format 9 (dual layer) DVDs with the new multi-layer DVD laser refocus test.**

**Faster drive library start up ...user selectable time out value plus more efficient memory use when base memory is tight.**

### **The PC-Check PC Diagnostic Software package**

Pc-Check's test package comes complete with Self-booting Diagnostic Software, DVD/CD Test Disk, and all Loop-Back I/O Plugs. Fast to install and easy to use, you can be running over 500 sophisticated diagnostic tests on your PCs swiftly and easily.

For PC manufacturers, Pc-Check can be supplied as a site license for burn-in testing. PC support services and manufacturers both benefit from distributing Virtual Pc-Check as end user bundles.

- **PC Diagnostic Software Program (OS independent self boot)**
  - \*PC-Check is now fully bootable from a CD-ROM, and you can make disks versions too!
- **Comprehensive instructions**
- **Loop-back plugs (1- 25 pin parallel, 1- 25 pin serial, 9pin serial plugs, 1 Intelligent USB (supports USB 1 and 2)**
- **CD/DVD Rom Test CD**
- **1 Year of Free Upgrades**

## **DETAILED PC Check HARDWARE AND SOFTWARE FEATURES**

- Independent testing, fully self-booting, no installation of operating system required
- Easy-to-use hardware tests check all PC components are running reliably
- Validate prototype and pre-production hardware during original equipment development
- Current hardware tests ensure PCs are built, upgraded and repaired correctly, regardless of brand
- Core system testing maximizes component reliability and working system integrity
- **Hardware add-ons included to enhance troubleshooting: Smart USB port test plugs, and CD/DVD ROM Test Disk**
- Reduces expensive field service calls, 'No Trouble Found' (NTF), wrongful product returns, overstocking field service products
- *Pc-Check Diagnostic Software* is the worlds number 1 requested PC diagnostic

### **Features:**

- Pc-Check® provides in-depth testing and diagnostic capabilities to identify problems and issues down to core component levels.
- Key features of Pc-Check® include: Single CDROM or floppy disk program operation.
- Bootable CDROM or floppy disk.
- PXE network boot option.
- Over 40 command line options.
- Unlimited test log files & reports.
- Memory testing supports any memory size to the current limits of x86 technology.
- Multi-cycle, timed & pass burn-in testing.
- Multi-media testing.
- Latest CPU support including AMD, Intel, etc. Supports multiple processors for all CPU tests including 64bit (AMD64/EM64T) testing.
- Employs JIT code generation
- and virtual CPU models to
- provide unlimited test
- combinations.

- CMOS editor, I/O Port mapping.
- ATAPI device usage.
- Advanced USB Controller tests.
- Advanced memory testing.
- Memory microtopolgy locality
- detects evasive errors including
- BUS noise.

## Product Overview

- Single CDROM or floppy disk
- program operation.
- Bootable CDROM or floppy disk (no
- OS needed).
- PXE network boot option.
- Over 40 command line options.
- Unlimited test log files & reports.
- System file editor.
- Multi-cycle, timed, pass burn-in test.
- Multi-media testing.
- Latest CPU support AMD, Intel, etc.
- I/O Port mapping.
- ATAPI device usage.
- Advanced USB Controller tests.
- User friendly interface.
- Advanced memory testing.
- Modem tests up to 115,200 baud.

## Specialist Features

- **USB Utilities:**
- OHCI/UHCI controller detection test.
- Root Hub device information.
- 4 Host controllers & 60 Root hub
- ports can be tested at one time.
- **SCSI Utilities:**
- Device identification.
- 1:1 Interleave support.
- Low-level format, bad block assign.
- **Progressive Hard Drive Utilities:**
- IDE, SATA, PATA drives.
- Read verify, Timed Testing, HPA
- UDMA (66/33/100/133)\*.
- 48bit addressing.
- Controller diagnostics.
- **Eurosoft Script Utility:**
- System File Editor.
- Record test starting times/dates.
- Track hardware problems.
- File location option.
- **Save & Restore Utility:**
- CMOS settings, Boot Block
- **System Management BIOS Information.**
- **Configuration Manager.**
- **Custom ROM Sizes.**

- **Partial system & burn-in testing.**
- **Hardware Specification Image file.**
- **System stress test.**
- **System Asset Configuration:**
- **Machine Type and Operation:**
- Processor type & speed ACPI Table test.
- Co-processor identification.
- BIOS signature and release date.
- **Interrupt Vectors**
- Value and usage.
- PCI - I.D., location, type, size.
- **System Memory**
  - . Base, extended and expanded.
  - . Internal and external cache size.
  - . PCMCIA & PC Card.
  - . Memory and Linear Address Viewer.
- **Multimedia**
  - . Multiple CDROM/DVD support (I).
  - . PCI/ISA cards, Video Adaptors.
  - . S/VGA.
- **Video memory sizing**
  - . VESA 2/3 support.
  - . Memory support up to 4Gb.
- **Disk Drives**
  - . Installed hard and floppy drive sizes.
  - . Controllers, Sector Viewer.
- **Device Drivers**
  - . Type and identification.
- **Network Adaptors.**
- Mouse Installation.
- IRQ Assignments.
- Advanced Power Management.
- Advanced Configuration and Power.
- Interface Information.
- Component Testing
- **Memory (stick)**
  - . Memory Microtopolgy Locality.
  - . Inversion tree.
  - . Progressive inversion.
  - . Chaotic addressing.
  - . Block rotation, module-by-module.
  - . Optional user pattern.
- **Memory**
  - . Integrated & external cache memory.
  - . Cache fault detection algorithms.
  - . Auto-repeat without Burn-in mode.
  - . L3 cache support.
  - . Refresh and address line.
- **Hard Drive (IDE, SATA, PATA, SCSI\*)**
  - . Mechanical stress testing.
  - . Non-destructive read/write,.
  - . Destructive write tests option.
  - . Controller diagnostics.
  - . UDMA (66/33/100/133)\*.
  - . 48bit addressing.
  - . Read verify.
  - . Time Controlled Testing.
  - . HPA support.
  - . SMART Testing
- **Floppy Disk Drive (1 to 2)**
  - . Write protect, disk change.
  - . Read/Write tests, Controller diagnostics.
- **DVD\*/CDROM Drive (1 to 4)**
  - . Transfer test, Random Seek (I).
  - . Read, Play, \*DVD Laser Refocus (I).
- **USB**
- UHCI & OHCI (L).
- USB information (L).
- Device listing (L).

- External PortPlug (L).
- **Serial Ports (maximum 8)**
- Handshake signals, interrupt
- generation (L).
- Individual pin testing (L).
- IRQ display.
- FIFO exercise.
- ePoS option.
- **Parallel Ports (maximum 3)**
- Printer output - Status port.
- Interrupt generation (L).
- Controller testing (L).
- Individual pin testing (L).
- IRQ display.
- EPP/ECP port support (L).
- **Motherboard**
- DMA controller, CMOS settings.
- PCI.
- CMOS RAM, system timers.
- Interrupt and keyboard controller.
- **Video Adaptor**
- Monitor alignment linearity and dead LCD pixels.
- Memory, character set & attributes.
- Test cards, High/True colour, Check
- Gamma, and Check colour linearity.
- **Keyboard & PS/2**
- Functionality test, controller signals,
- Scan codes, LEDs, key operations (I).
- **Mouse**
- Driverless testing.
- Operations, 2 or 3 button (I).
- Text and graphics modes.
- **Processor & Co-processor**
- Type identification & testing.
- MHZ Monitor.
- Full 3D-NOW! SSE/SSE2 and MMX
- instructions testing.
- Multi-Processor type identification & testing.
- **Multimedia**
- Sound card, AC'97 PCI.
- FM & sampled audio tests.
- Driverless CDROM/DVD analysis (I).
- **ATAPI Devices**
- LS-120, Zip drives.
- Magneto optical cartridges.
- **Modem (1 to 4)**
- Writable registers.
- Generates carrier & dialling tones.
- Internal analogue loop-back.
- \*BIOS suport required,
